

## Upper limb Short questions

- 1- What is the weakest point of the clavicle, give the position of the distal fragment?
- 2- What are the structures which pierce the clavipectoral fascia?
- 3- What is the structure which pierces pectoralis minor muscle?
- 4- What is the structure which pierces the coracobrachialis muscle?
- 5- Name the structure which is attached to the margin of the glenoid cavity, give its function?
- 6- What are the structures which pass through the suprascapular foramen, give its distribution?
- 7- What is the attachment and function of the coraco-clavicular lig?
- 8- What is the type of fibers of subscapularis muscle, what is the character of this type of fibers?
- 9- What is the only muscle in the upper limb which has a pelvic origin?
- 10- What is the pathway of the lymphatic drainage of the medial and lateral parts of the mammary gland?
- 11- What is the line of incision to drain breast abscess, why?
- 12- How can you stop severe bleeding from the proximal part of the upper limb?
- 13- What is the nerve supply of the trapezius muscle, what is the effect of its paralysis?
- 14- Name and give the origin of the anastomosing arteries on the upper part of the back of the humerus?
- 15- Give the surface anatomy of the axillary artery?
- 16- What is the rotator cuff, give its components and function?
- 17- What is the cutaneous distribution of the musculocutaneous nerve?
- 18- What is the lymphatic drainage of the medial and lateral parts of the hand?
- 19- What are the structures which pierce the interosseous membrane, give its origin?
- 20- Name the muscles which the radial artery passes between its two heads in the hand?
- 21- Where can you feel the pulsation of the radial artery?
- 22- What is the motor distribution of the radial nerve in front of the lateral epicondyle?
- 23- Which parts of brachial plexus are related to the axillary artery?

- 24- What is the bicipital aponeurosis, what does it separate?
- 25- What is the nerve supply of the latissimus dorsi, give its root value, what is the effect of injury of this muscle?
- 26- What is the line of incision in the axilla to drain an abscess, why?
- 27- Name the muscles supplied by the dorsal scapular nerve, what is the effect of its injury?
- 28- What are the contents of the delto-pectoral groove?
- 29- Give the cutaneous supply over the lower half of the deltoid muscle. What is the effect of the paralysis of this muscle?
- 30- What are the muscles responsible for elevation of the arm above the level of the head?
- 31- What are the contents of the upper part of the bicipital groove?
- 32- What is the dermatomal supply of the over, tip of the shoulder joint and floor of the axilla?
- 33- What is the type of the carpo-metacarpal joint of the thumb, what are the movements of that joint and muscles responsible for it?
- 34- What are the two structures which are separated by the deep head of pronator teres?
