

Upper Limb

1

*Medial border of
the scapula*

3

2

❖ Muscles of the back:

1. *Trapezius*
2. *Rhomboid major*: *beneath the trapezius.*
3. *Rhomboid minor*: *above the rhomboid minor.*
4. *supraspinatus*: *above the spine of the scapula.*
5. *Infraspinatus*: *below the spine of the scapula.*
6. *Teres minor*: *above the long head of triceps and teres major.*
7. *Teres major*: *below the long head of triceps.*
8. *Levator scapulae*: *beneath the trapezius, coming from above to the scapula.*

4

5

Long head
of triceps

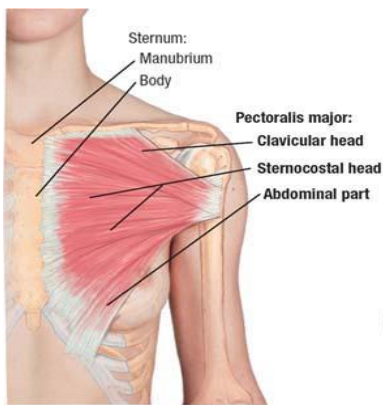

❖ Muscles of the arm :

1. *Deltoid*
2. *coracobrachialis* : medial muscle in the arm originates from coracoid process and inserts in the medial shaft of the humerus.
3. *Biceps brachii* : lateral to the coracobrachialis , has two heads.
4. *Brachialis*: medial to the biceps brachii .. found in the lower part.
5. *Triceps* : in the posterior part of the arm , has three heads.

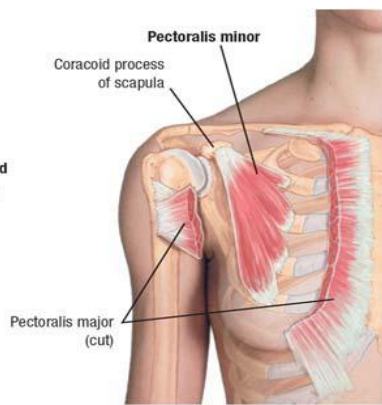

❖ Muscles connecting the upper limb to the thorax :

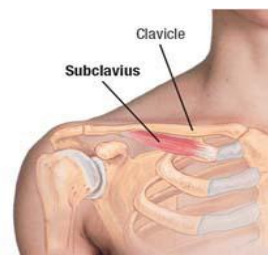

- 1- *Pectoralis major* : inserted in the lateral lip of the bicipital groove
- 2- *Pectoralis minor* : originates from the 3rd , 4th , 5th ribs and is inserted in the coracoid process.
- 3- *Subclavius* : beneath the clavicle
- 4- *Serratus anterior* : originates from the outer surface of the first 8th ribs and inserts at the medial border of the scapula
