

- Practical Anatomy of Musculoskeletal Block

Humerus Bone:

1. Parts of Humerus Bone :

- Anterior Aspect:

Head
Anatomical neck
Great tubercle
Bicipital groove
Lesser tubercle
Surgical neck
Deltoid tuberosity
Shaft
Lateral epicondyle
Medial epicondyle
Coronoid fossa
Radial fossa
Trochlea
Capitulum

2. Identifications:

- Right / Left

- * The head should always be on the medial side*
- * The medial epicondyle is also on the medial side*

- Anterior / Posterior

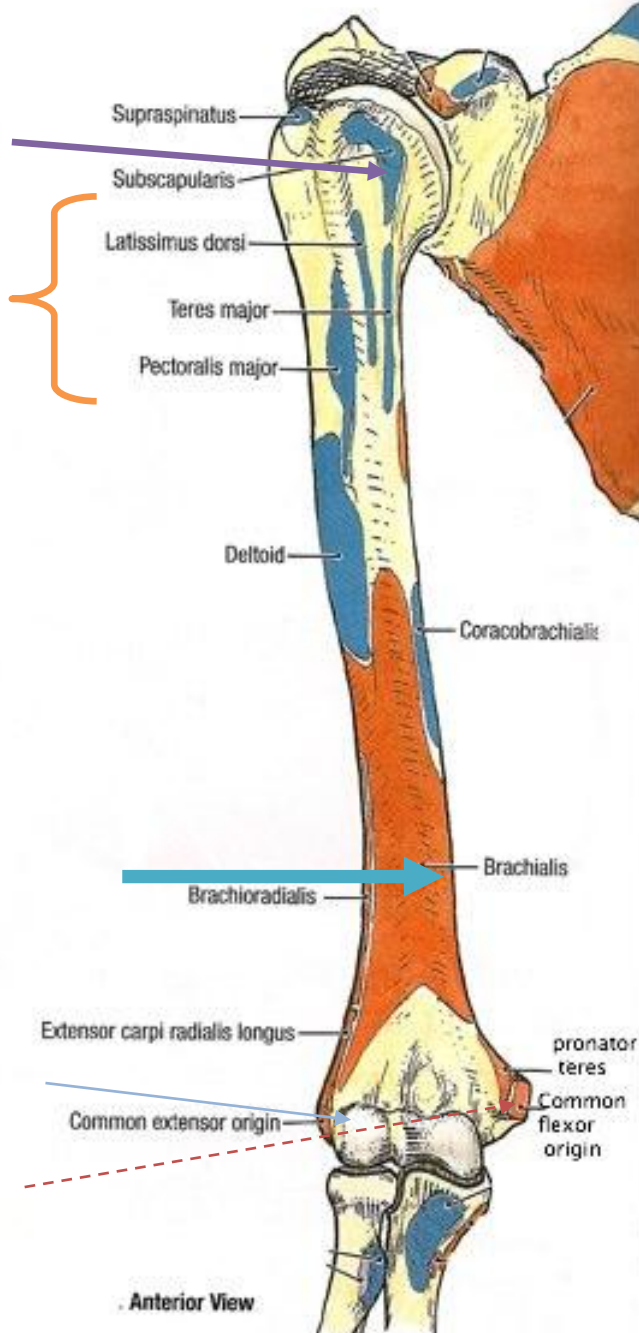

- * Anterior aspect:* - Great and lesser tubercles.
- Coronoid fossa medially + Radial fossa laterally.
- * Posterior aspect:* - Olecranon fossa.

3. Origins and insertions of the anterior / posterior aspects of the humerus :

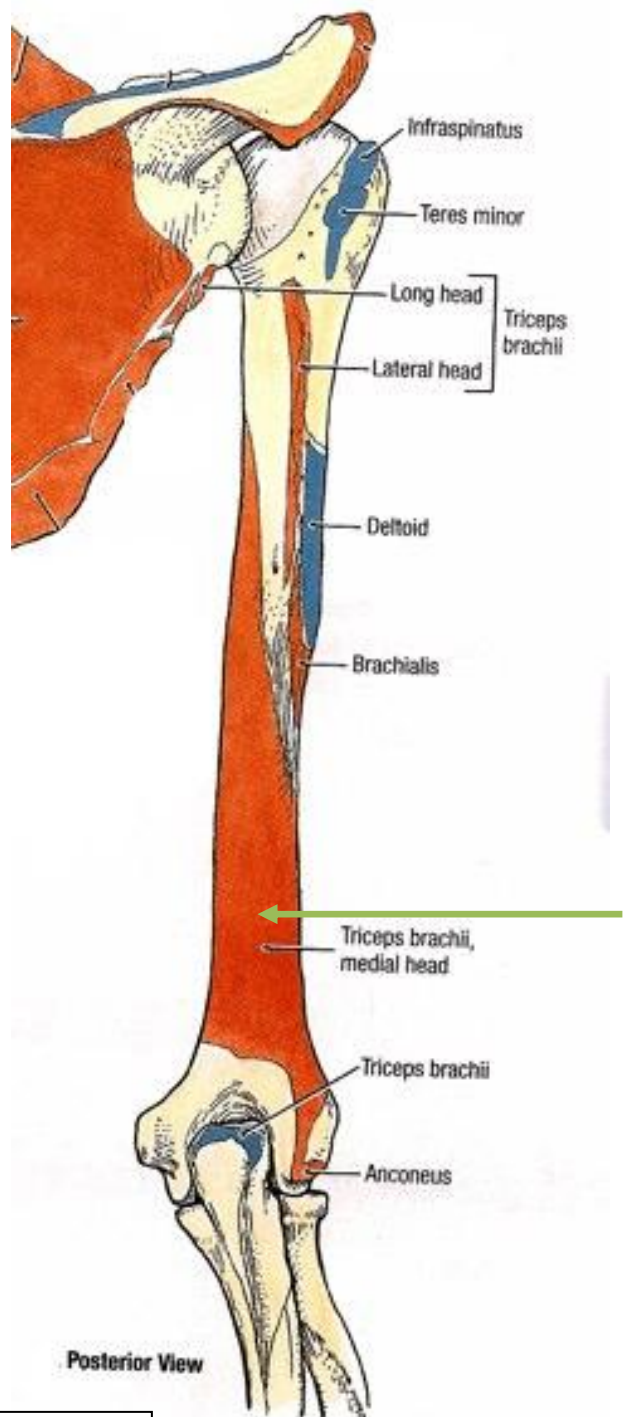

- Practical Anatomy of Musculoskeletal Block

Anterior View

Posterior View

Humerus :

- 1- Medially → head of the humerus
- 2- Anteriorly two small fossae (on the lower part)
- 3- Posteriorly → 1 big fossa (lower part)
