History of Blackboard

- Founded in **1997**
- Founded as a **powerful educational tool**
- 1998-Released first software program at Cornell University
- Since then, expanding and changing software while making four more software applications

Literature about Blackboard

- ▶ Bb is a **multimedia curriculum-driven** learning system that provides instructors with control and flexibility.
- ▶ Worldwide educational institutions started using e-learning tools such as Bb as a part of their instructional setting.
- ▶ Chawdhry et al. (2011) showed that **students preferred using Bb** as it improves communication with the course instructor and other students.
- ▶ Robert et al (2004) reported that Bb adaptation by students in **US (78.1%) and UK (74.3%)**
- ▶ Abuloum et al (2006) **95% students agreed** about Bb was useful in submitting **homework, assignments and discussion** with others , **even though some technical problems.**

Explain the content of Blackboard learning management system and its configuration

- Learning management system (LMS) is a comprehensive system to manage learning and is the **central hub of the educational process** on the Internet.
- Where courses are delivered in **electronic format to all users** of the system.
- Learning management system is easy to use and you can **access it anytime and anywhere**.
- Students can login to the system and access to the contents of the courses, and conduct academic activities.

A. Discussion sessions

B. Delivery responsibilities

C. The performance of examinations. **etc.**

Different uses of Blackboard.

- An online learning tool used by both teachers and students
- Online accessible course materials through Bb can help student to study anywhere and anytime (both on and off campus).
- Allows students to see the course information, course material, exam dates etc. So students can retrieve it online
 - Grades
 - Student guide
 - Syllabus
 - Assignments
 - Lectures
 - Calendars and due dates
 - Tests

1. Providing interactive tools for learners:

- **An announcement:** this tool enables learner to know the latest news, notifications or announcement that faculty members want to send to learners.
- **Calendar:** this tool is provided to the learner the time of events related to the subject of learning and remind him when due, time and the learner can add to it whatever he wants.
- **Tasks:** informing the learner what he has to do of tasks, it also allows him to organize them according to subject or to his personal vision.
- **Grades:** this task is for grades, whether for midterms or final exams.
- **User manual:** this tool provides list of participating students to know each other.

2. **Content display:** the main function of the system is to provide educational content to learners

3. **Contact:** the system provides three ways of communication between students and between students and the teacher as follows:-

- Send and receive mail messages, which provide a list of names and mailing addresses of the learners.
- Discussion boards: asynchronous interaction tools.
- Virtual classroom.

4. **Follow students'** progresses with the entrance to the material and held the evaluation tests.

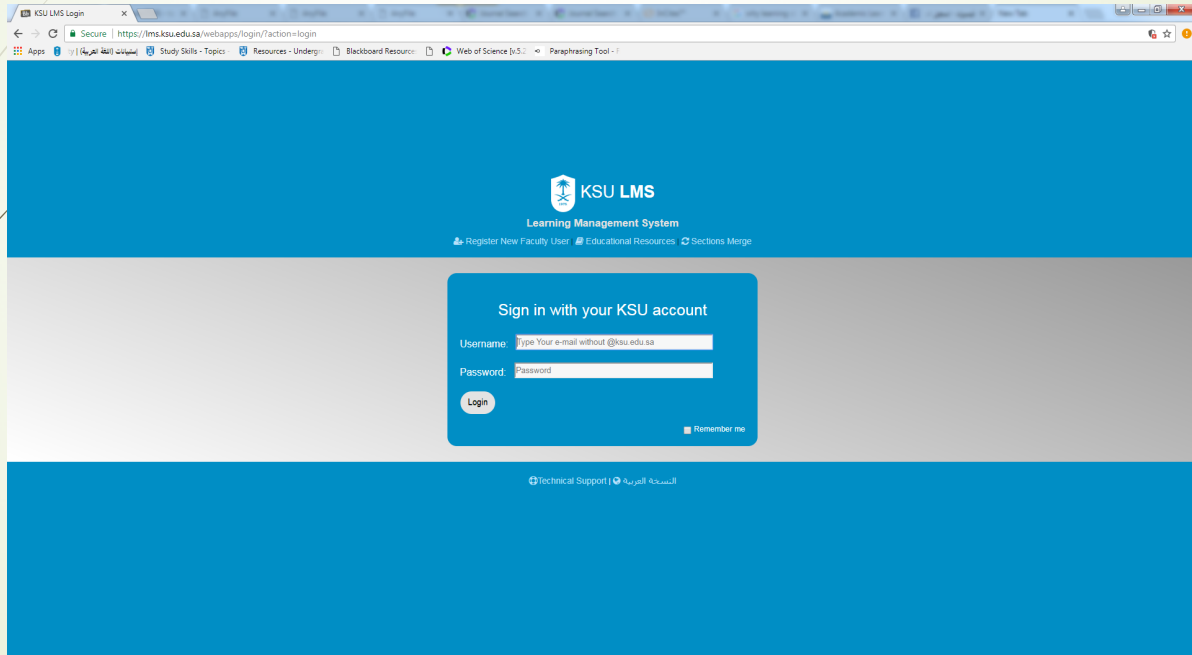

5. **Provide time** to the faculty member, where he/she can create tests that can automatically correct. Also, the System can collect all grades from all resources (assignments-tests..Etc.)

Blackboard: Discussion Board

- ▶ **A whole class** can form a study group without being **physically gathered in one place**
- ▶ Students can **help each other**
- ▶ **Instructor can provide help**
- ▶ Students can be connected rather being alone and isolated when they study.
- ▶ Great help for online courses and regular courses
