

Morning!

In this file is the summarization of all final lectures, the summary is based on the doctor's lecture and the notes he gave.

Each lecture is cut short into 2-3 pages & it includes every single bit of info mentioned in the objectives, hopefully it helps.

Again, this is a one-man work, mistakes are prone to happen, but I took my guard and checked the work over and over again, if however u still managed to spot some things here and there; feel more than free to contact me (0535502191) and I'll do my best re-correcting it.

Best of luck...
