

Hi...

Glad you bothered to open my work!

In this file is the summarization of all midterm lectures in ECS block, as you can see I already used ECS (which stands for Endocrine system). You'll find heck lots of those short-cuts in my work, but they're easily understood and you can very easily get them.

This is a one-man work, mistakes might be present, but it's highly unlikely, I checked the work over and over again.

In a nutshell: every lecture is summarized in 2-3 pages, and every single note that have been written on doctors lectures files are present, so it's unlikely that midterm questions will include anything I didn't mention, in other words, studying this work is sufficient enough to get you full marks in the exam.

Feel free to contact me anytime regarding any issues.... (0535502191)
