<i>Health Education Clinical Settings</i>
<i>Obesity</i>
<i>School Health</i>
<i>Nutrition</i>
<i>Heat Stroke &amp; Heat Exhaustion</i>

This is a modified version of what may sent earlier. We deleted the lectures that were not included in the “final” folder in the download center. Yet, were not sure if they are included or not.

If you depend on the team, please make sure that you study the latest version of “*Enviromental Health & Hazards*” as it is being updated now.

As for maternal and child health, it’ll be sent soon inshallah.

Regarding seminars, we do not work on seminars except for one. The doctor said that he sent 5 questions from the students’ work to be included as MCQs in our exam. Yet, we can’t guarantee that. Anyway you’ll find the seminar in our work.

Good luck all,

Regards,

Team’s members
