

# Nasogastric Tube

<https://drive.google.com/file/d/1ZBmstGUvEiBfJo-vg0Jfe7T9gd6oKkaE/view?usp=sharing>

- **WIPE.** (WIPE. بالاوسكي ممكن الي يختبرك يقول ان البيشنت رفض العملية هذي ف وش راح تسوي وقتها ؟ تحاول تقنعه ان العملية مهمة وإنك تتفهم انها ما راح تكون مريحة له ) لكن لو مو ضرورية ما راح تدخله انت بالمشاكل هذي)
- **First start by preparing your equipment** ( بالاختبار يقول الدكتور مو شرط يكون كل شيء جاهز ممكن تكون الأشياء على الطاولة و ) انت تجمعها)
- **You gonna need (gloves, syringe, lubricant, tape, nasal tube, torch, avocaine spray (not necessary))**
- **Before wearing your gloves prepare your tapes.** (One to mark your point on the tube and two for placing the tube)
- **Start by measuring the tube.** (tip of the nose, behind the patient's ear and two fingers above the umbilicus)
- **Mark your point with a tape or a pin it doesn't matter.**
- **Check if the nostrils are clean and you can spray avocaine if you want to but it's not really important.**
- **Soak the tube in lubricant then ask the patient to drink water while inserting the tube.**
- **With the manikin you'll be pulling the epiglottis and remember you have to pull and release just like if it was a real patient.** ( و عادي حتى مع المانكن تكلم كأنك مع بيشنت صدق و كل شوي تقوله اشرب مويه )
- **Don't stand in front of the manikin and don't look at its stomach to check if the tube is inside.** (الدكتور قال بقييمون على هذي)
- **Stand next to it and stop inserting when you reach your mark.**
- **Pull 20 CC of air and the put your stethoscope at its abdomen and inject air, you're supposed to be hearing bubbles.** (بالاوسكي قالوا راح يحطون مويه بالمانكن ف راح نسمع بيلز صدق))
- **Place your tapes and make sure that the tube is not moving.**
- **Connect it to the bag and mention that you'll document date, time and patient's ID then you'll send the patient to x-ray. remember the tube is not supposed to be inserted for more than 48 hours.**
- **ولا تنسون تنظفون المكان و ترجعون كل شيء زي ما كان بعد ما تخلصون الدكتور تقول تنحط النقطة هذي بالتقييم.**

**Done by:** Abdulaziz Alhammad and Ahmed Al Yahya.
