Amr A. Jamal, MD, SBFM, ABFM, MRCGP, GCCI, MBI
Chairman, Associate Professor and Consultant
Family Physician and Clinical Informatician
Family and Community Medicine Department
College of Medicine, King Saud University

What is the first step in the evidence based practice process?

- A. Applying research to practice
- B. Acquiring available research and evidence
- C. Assessing the impact of change
- D. Asking a clinical question
- E. Appraising the research quality

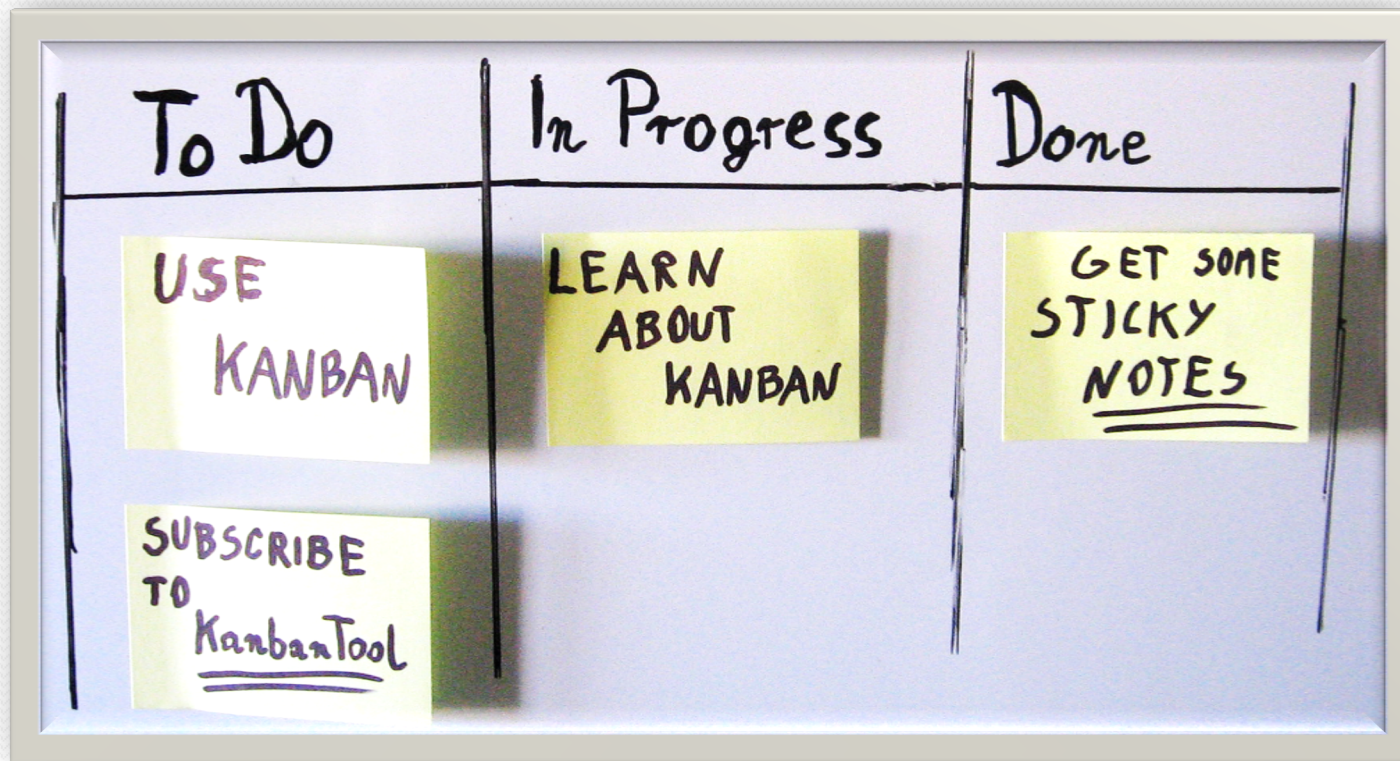

5-step EBM process

Foreground Vs. Background EBM questions

Kanban Board

2nd step: Acquire

Where do you search for evidence?

Hierarchy of evidence

Levels of evidence

Sources of evidence (6 Ss)

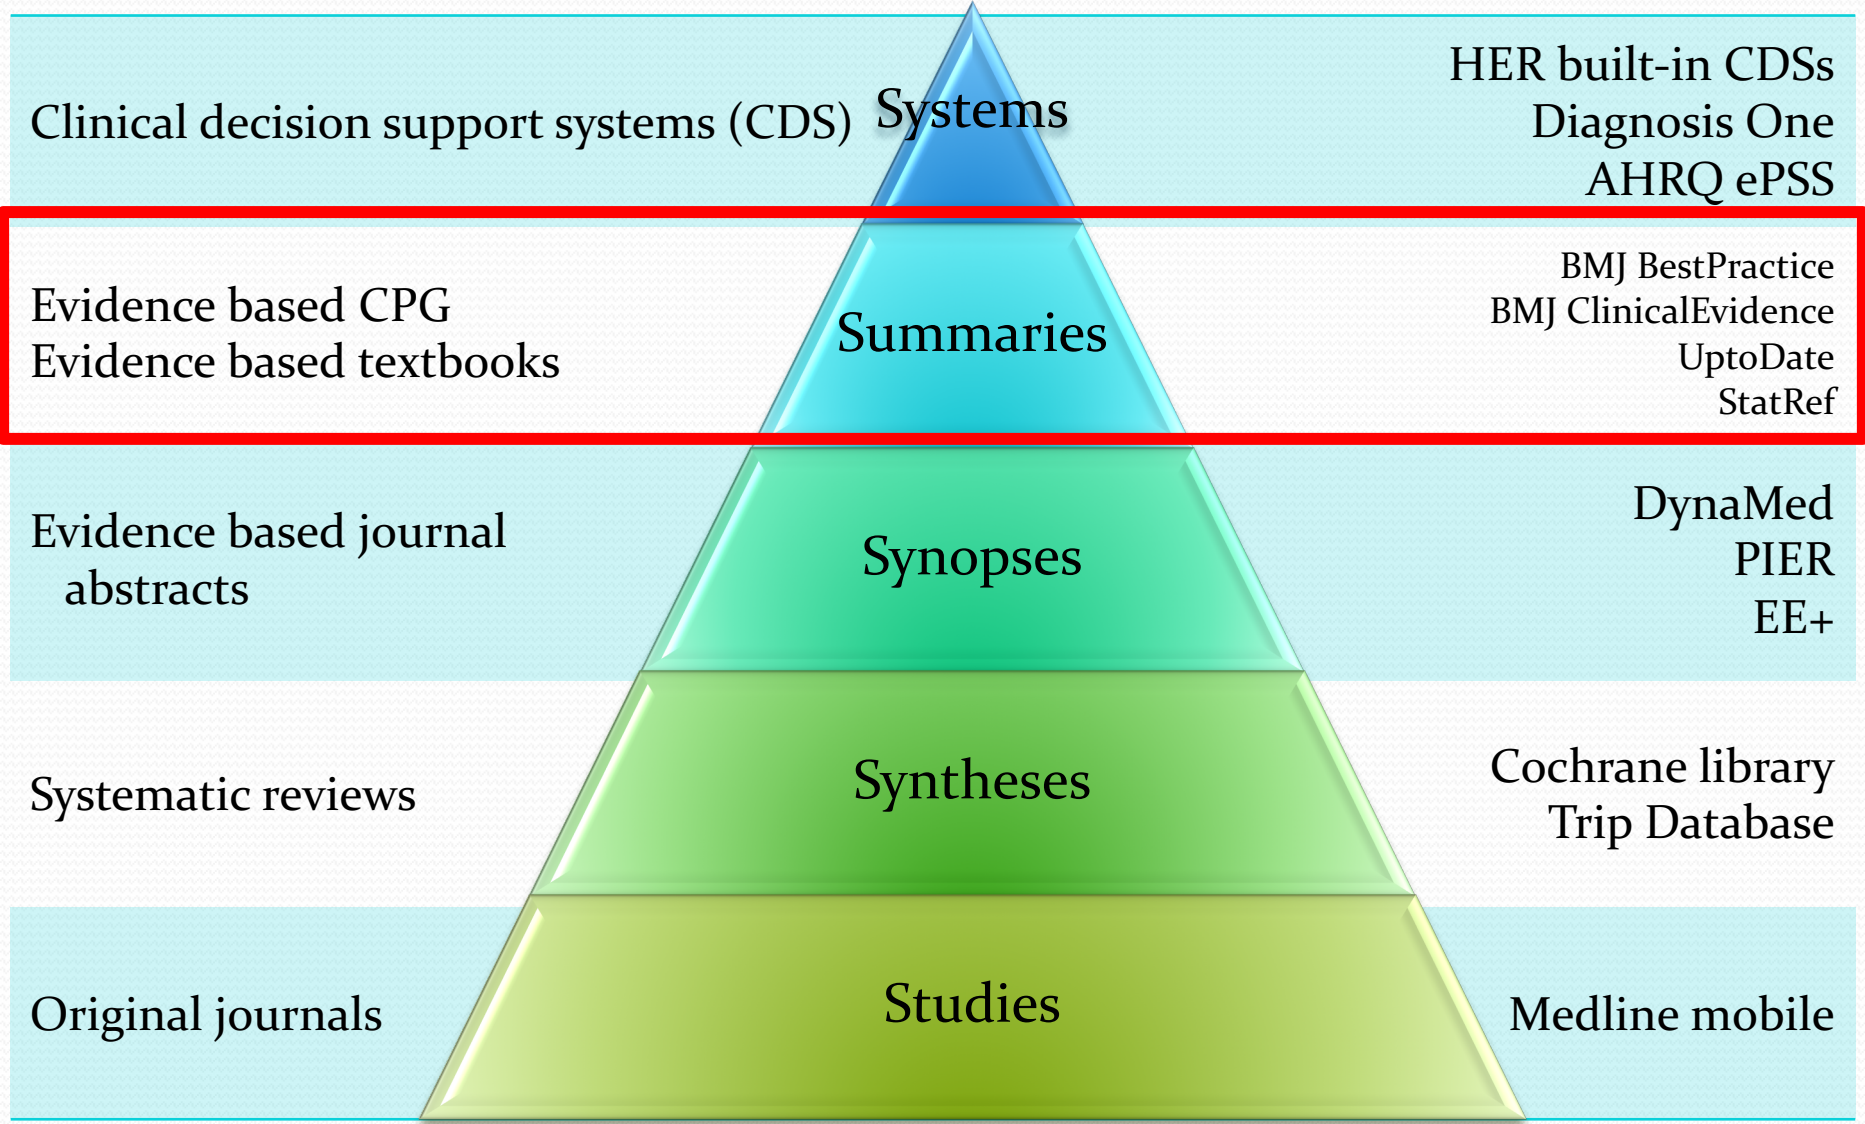

Oxford Centre for Evidence-based Medicine Levels of Evidence (May 2001)

2001)

Level	Therapy/Prevention, Aetiology/Harm	Prognosis	Diagnosis	Differential diagnosis/symptom prevalence study	Economic and decision analyses
1a	SR (with <u>homogeneity*</u>) of RCTs	SR (with <u>homogeneity*</u>) of inception cohort studies; <u>CDR†</u> validated in different populations	SR (with <u>homogeneity*</u>) of Level 1 diagnostic studies; <u>CDR†</u> with 1b studies from different clinical centres	SR (with <u>homogeneity*</u>) of prospective cohort studies	SR (with <u>homogeneity*</u>) of Level 1 economic studies
1b	Individual RCT (with narrow <u>Confidence Interval‡</u>)	Individual inception cohort study with ≥ 80% follow-up; <u>CDR†</u> validated in a single population	Validating** cohort study with <u>good†††</u> reference standards; or <u>CDR†</u> tested within one clinical centre	Prospective cohort study with good follow-up****	Analysis based on clinically sensible costs or alternatives; systematic review(s) of the evidence; and including multi-way sensitivity analyses
1c	<u>All or none§</u>	All or none case-series	<u>Absolute SpPins and SnNouts††</u>	All or none case-series	Absolute better-value or worse-value analyses †††
2a	SR (with <u>homogeneity*</u>) of cohort studies	SR (with <u>homogeneity*</u>) of either retrospective cohort studies or untreated control groups in RCTs	SR (with <u>homogeneity*</u>) of Level >2 diagnostic studies	SR (with <u>homogeneity*</u>) of 2b and better studies	SR (with <u>homogeneity*</u>) of Level >2 economic studies
2b	Individual cohort study (including low quality RCT; e.g., <80% follow-up)	Retrospective cohort study or follow-up of untreated control patients in an RCT; Derivation of <u>CDR†</u> or validated on split-sample§§§ only	Exploratory** cohort study with <u>good†††</u> reference standards; <u>CDR†</u> after derivation, or validated only on split-sample§§§ or databases	Retrospective cohort study, or poor follow-up	Analysis based on clinically sensible costs or alternatives; limited review(s) of the evidence, or single studies; and including multi-way sensitivity analyses
2c	"Outcomes" Research; Ecological studies	"Outcomes" Research		Ecological studies	Audit or outcomes research
3a	SR (with <u>homogeneity*</u>) of case-control studies		SR (with <u>homogeneity*</u>) of 3b and better studies	SR (with <u>homogeneity*</u>) of 3b and better studies	SR (with <u>homogeneity*</u>) of 3b and better studies
3b	Individual Case-Control Study		Non-consecutive study; or without consistently applied reference standards	Non-consecutive cohort study, or very limited population	Analysis based on limited alternatives or costs, poor quality estimates of data, but including sensitivity analyses incorporating clinically sensible variations.
4	Case-series (and <u>poor quality cohort and case-control studies§§</u>)	Case-series (and <u>poor quality prognostic cohort studies***</u>)	Case-control study, poor or non-independent reference standard	Case-series or superseded reference standards	Analysis with no sensitivity analysis
5	Expert opinion without explicit critical appraisal, or based on physiology, bench research or "first principles"	Expert opinion without explicit critical appraisal, or based on physiology, bench research or "first principles"	Expert opinion without explicit critical appraisal, or based on physiology, bench research or "first principles"	Expert opinion without explicit critical appraisal, or based on physiology, bench research or "first principles"	Expert opinion without explicit critical appraisal, or based on economic theory or "first principles"

Haynes' 5S pyramid of EBM resources

BMJ Group and McMaster University's Health Information Research Unit are collaborating to provide you with access to current best evidence from research, tailored to your own health care interests, to support evidence-based clinical decisions.

This service is unique: all citations (from over 120 premier clinical journals) are pre-rated for quality by research staff, then rated for clinical relevance and interest by at least 3 members of a worldwide panel of practicing physicians. Here's what we offer:

- A [searchable database](#) of the best evidence from the medical literature
- An [email alerting](#) system
- Links to selected evidence-based resources

Hit Parade: The most often read articles in all disciplines, in the past 30 days

1. [Effectiveness of non-steroidal anti-inflammatory drugs for the treatment of pain in knee and hip osteoarthritis: a network meta-analysis.](#)
Lancet (*Review*)
2. [Vaccines for preventing herpes zoster in older adults.](#)
Cochrane Database Syst Rev (*Review*)
3. [Blood-Pressure and Cholesterol Lowering in Persons without Cardiovascular Disease.](#)
N Engl J Med (*Original*)

Haynes' 5S pyramid of EBM resources

Systematic Reviews and Meta-analysis: Putting Results into Perspective

Systematic Review of Studies

A thorough, comprehensive, and explicit interrogation of the medical literature.

Meta-analysis

A statistical approach to combine the data derived from a systematic review.

What is Cochrane

- Archie Cochrane (1909-88)
 - British epidemiologist
 - Advocated RCTs to inform healthcare practice

- Cochrane collaboration
 - Cochrane Reviews (>4,000) registered
 - Identify, appraise and synthesise research-based evidence and present it in accessible format; regularly updated
 - Focus on interventions
 - Outstanding general resource

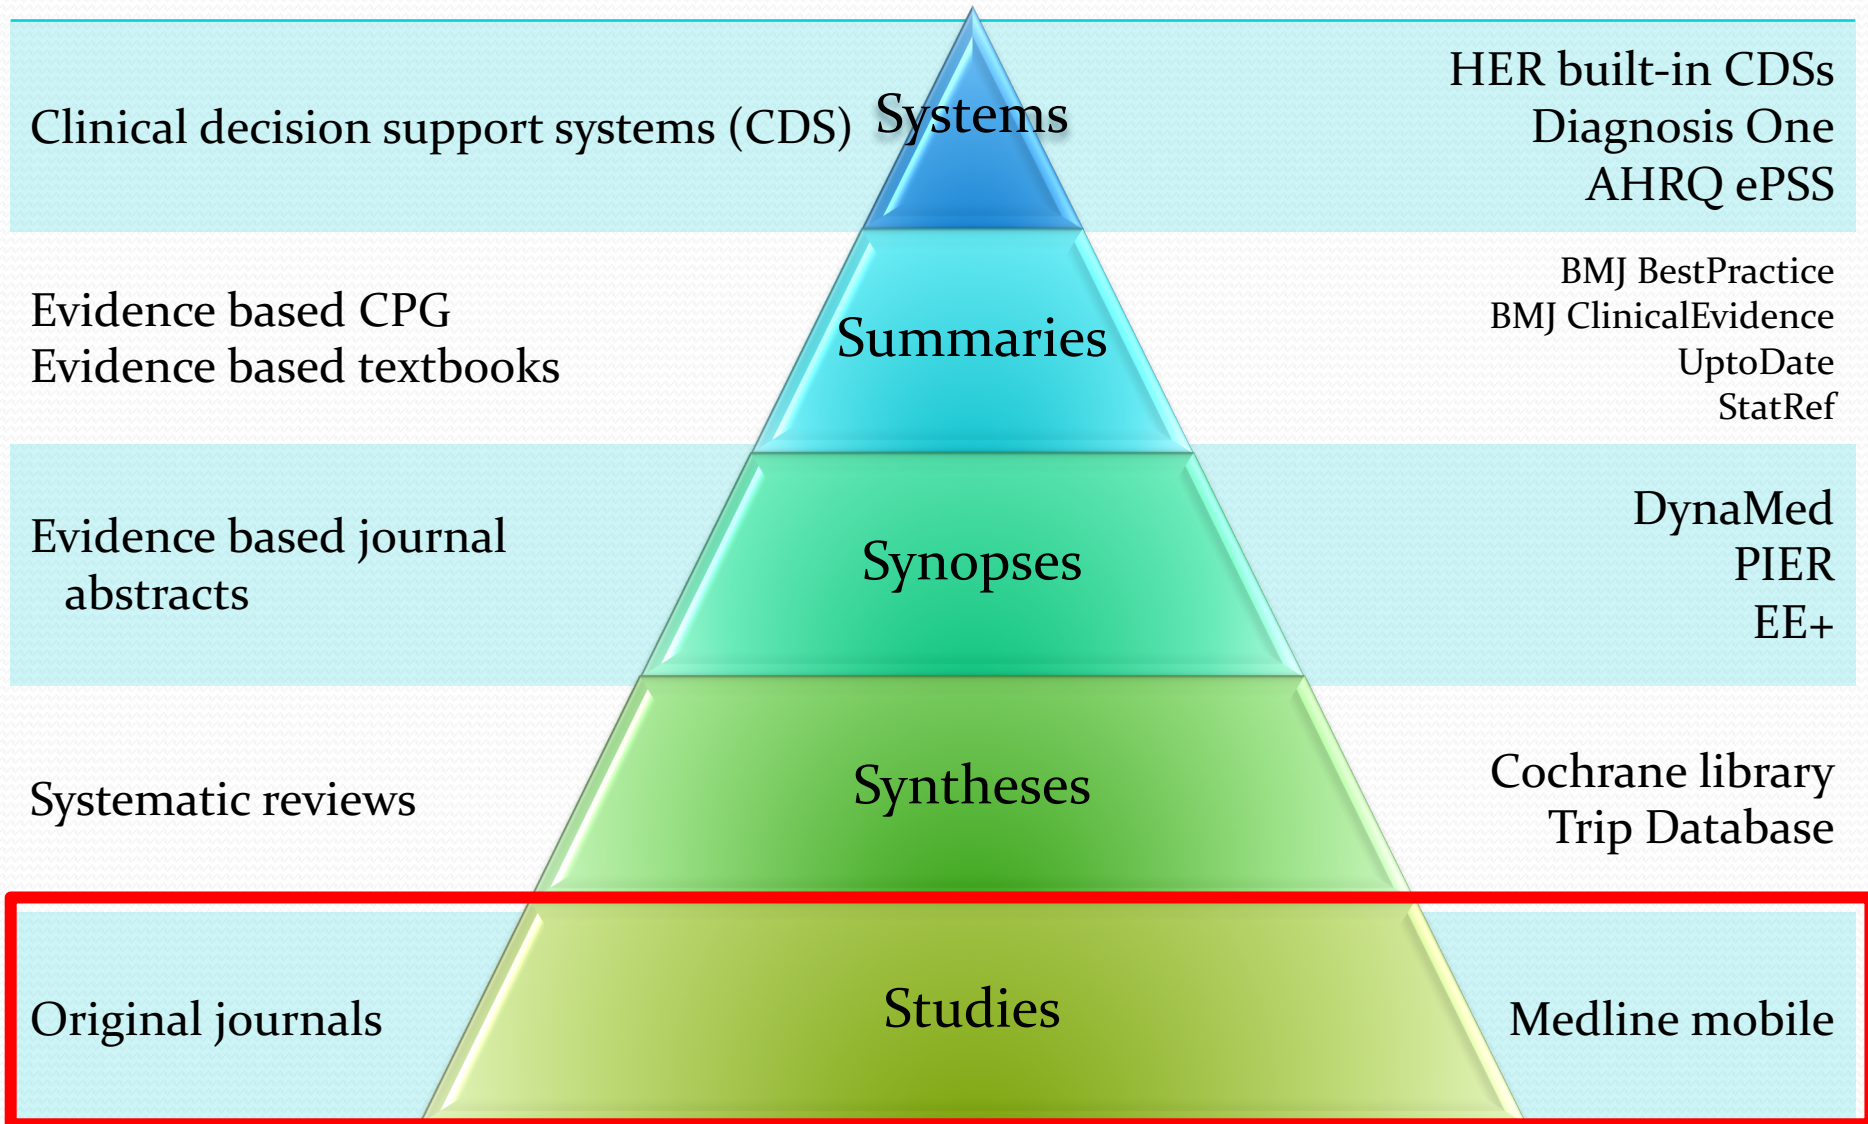

The School of Medicine,
Cardiff University and the
Cochrane Archive

Filtered and Critically Appraised EBM Resources

- *The Cochrane Library* by The Cochrane Collaboration via Wiley
 - Independent non-for-profit international collaboration
 - Reviews are among the studies of highest scientific evidence
 - Minimum Bias: Evidence is included/excluded on the basis of explicit quality criteria
 - Reviews involve exhaustive searches for all RCT, both published and unpublished, on a particular topic
 - Abstracts searchable for free on the Internet; complete database is available via OVID in SDL for all universities
 - 1995-

Haynes' 5S pyramid of EBM resources

Primary resources

- Global databases
 - (Cochrane, PubMed, Health PubMed, Ovid, Science Citations, grey literature, etc.)
- WHO databases
 - (global / regional): observatories; scientific journals (WHO Bulletin / EMHJ); surveillance; surveys; ICTRP; CPG, etc.
- National databases:
 - ENSTINET, SaudiMedLit; NCHS, CAPMAS; healthcare delivery institutions (websites, reports); clinical trials; grey literature, etc.

PubMed Health

<http://www.ncbi.nlm.nih.gov/pubmedhealth>

- **About Pubmed Health**

- PubMed Health provides information for consumers and clinicians on prevention and treatment of diseases and conditions.
- PubMed Health specializes in reviews of clinical effectiveness research, with easy-to-read summaries for consumers as well as full technical reports. Clinical effectiveness research finds answers to the question “What works?” in medical and health care.
- PubMed Health is a service provided by the National Center for Biotechnology Information (NCBI) at the U.S. National Library of Medicine (NLM).
